additional safeguards to prevent AI Overviews from generating inaccurate summaries, and began using [Gemini 2.0](#) to tackle more complicated questions, the feature can still return bizarre answers. For instance, an AI Overview recently told my colleague Kris Holt that the first day Canadians can start contributing toward their RRSP for 2026 starts on March 61.

At the [same event](#) where Google debuted the What People Suggest panel, the company had other health-related announcements. The search giant said it was releasing a series of new Medical Records APIs through its Health Connect platform. With the update, Google says it will be easier to connect your health data with data from your doctor's office. Google also provided an update on the [Pixel Watch 3's](#) loss of pulse detection feature. After announcing it was coming soon with the latest [Pixel feature drop](#), Google now says it will roll out at end of the month.
