...

If you do most of your work manually in today's fast-paced world.

Top highlight

[Highlight](#)[Respond](#)[Share](#)[Priv](#)

We should use our minds for creative ideas, important decisions, and useful judgment instead of small manual tasks.

Top highlight

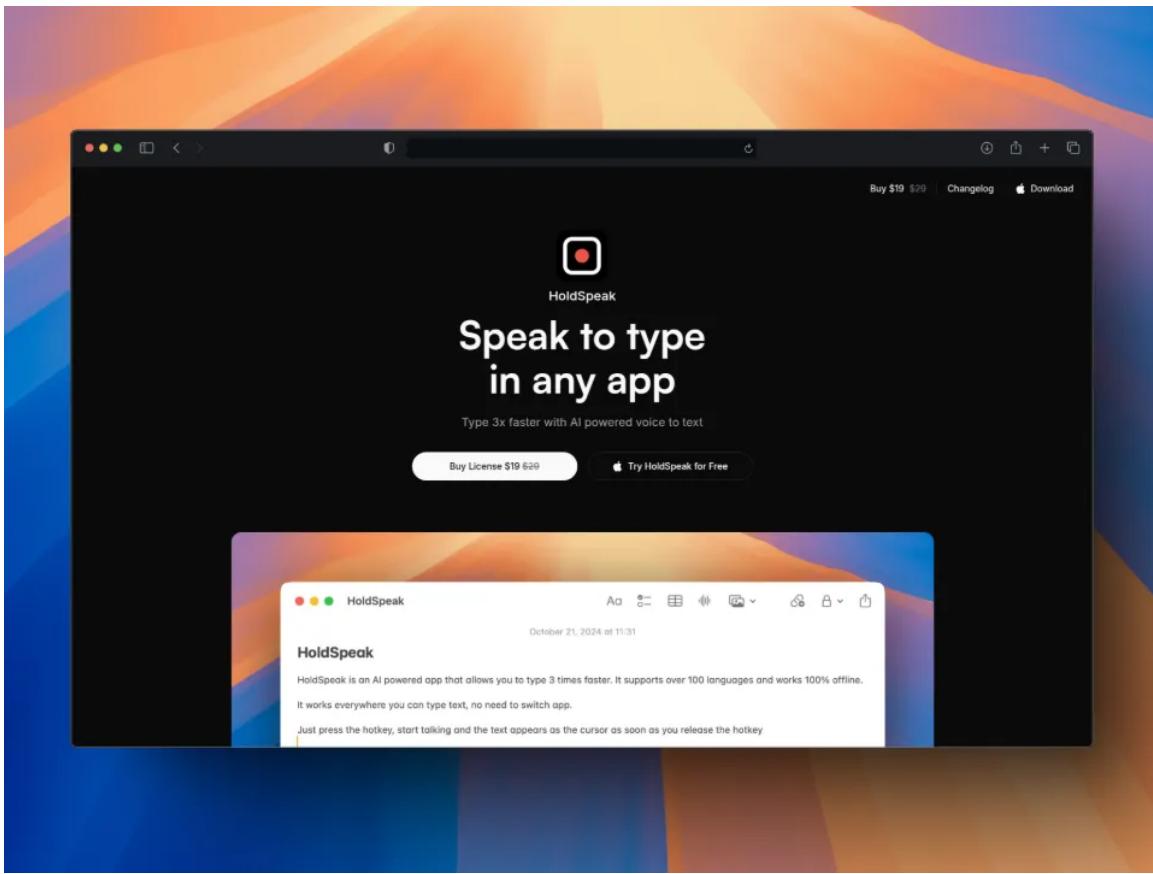

That's why I want to share some AI Apps that can increase your work speed and save you time on unnecessary tasks.

These apps can help you with a variety of tasks like —

- Boost your typing speed with AI voice-to-text.
- Make AI videos for free in one minute.
- Automate any workflow with AI
- Write and humanize content with AI
- Build products people really want

Let's start the list:

1. HoldSpeak

HoldSpeak speeds up your typing speed like crazy.

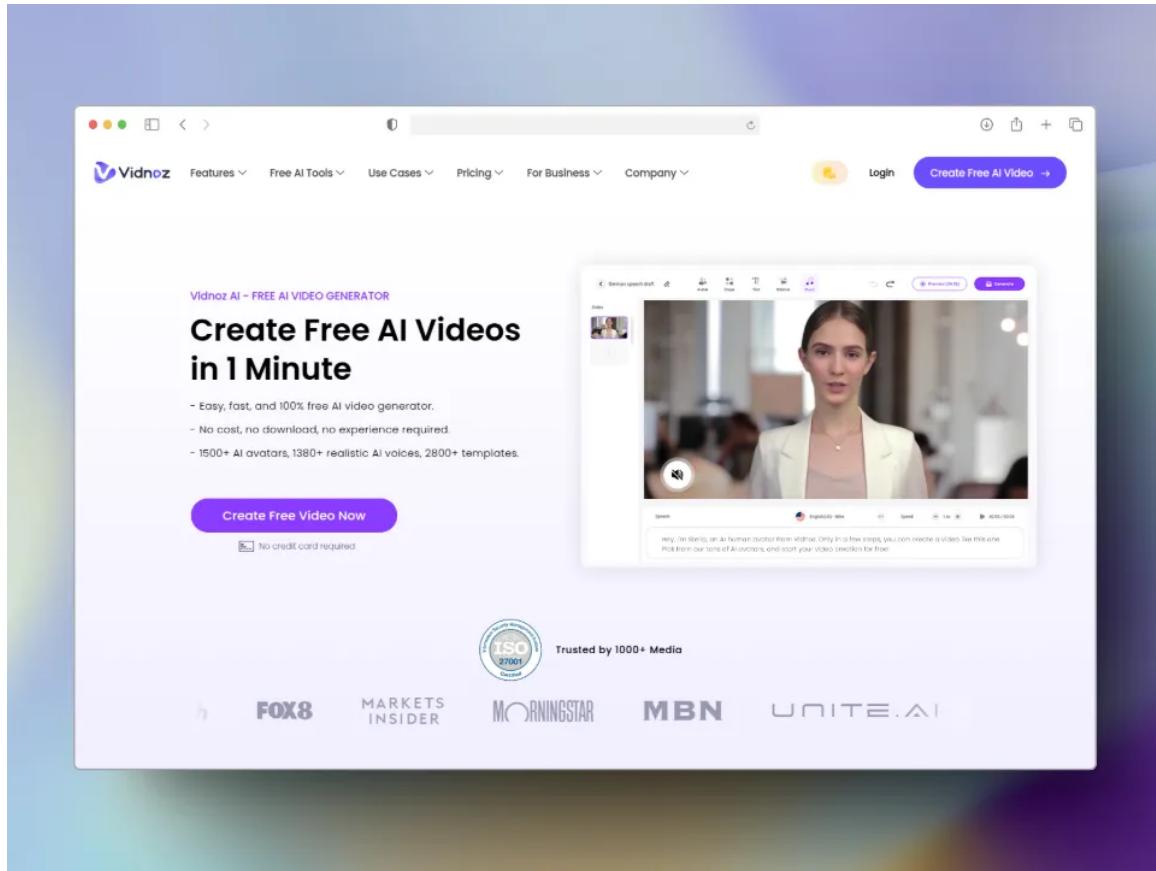

It's perfect for students, working professionals, and content writers. It uses AI to turn your voice into text very fast, so you can type 3 times faster.

You can use it with any app on your Mac, and it works offline also. It's so easy to use — just press a hotkey and start speaking. The app can understand more than 100 languages and also adds punctuation for you.

It's so lightweight, so it doesn't slow your computer.

2. Vidnoz

Want to create AI videos in minutes for free?

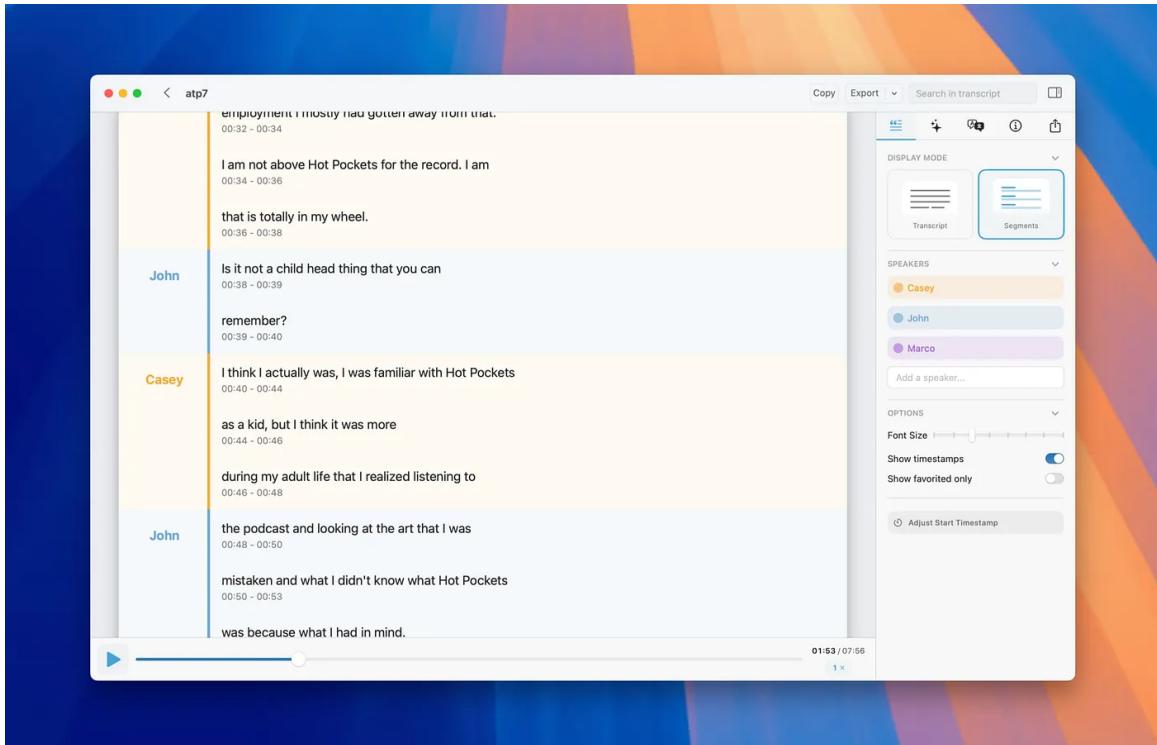

Vidnoz is perfect for anyone who does work related to videos. You can choose from more than 1500 realistic AI avatars and 2800 video templates to make videos in just a minute.

It has thousands of natural voices and it supports around 140 languages, so you can create videos that sound great in different ways.

Vidnoz AI is perfect for making videos for marketing, social media, ads, or learning. No experience is needed to start.

Link:

3. MacWhisper

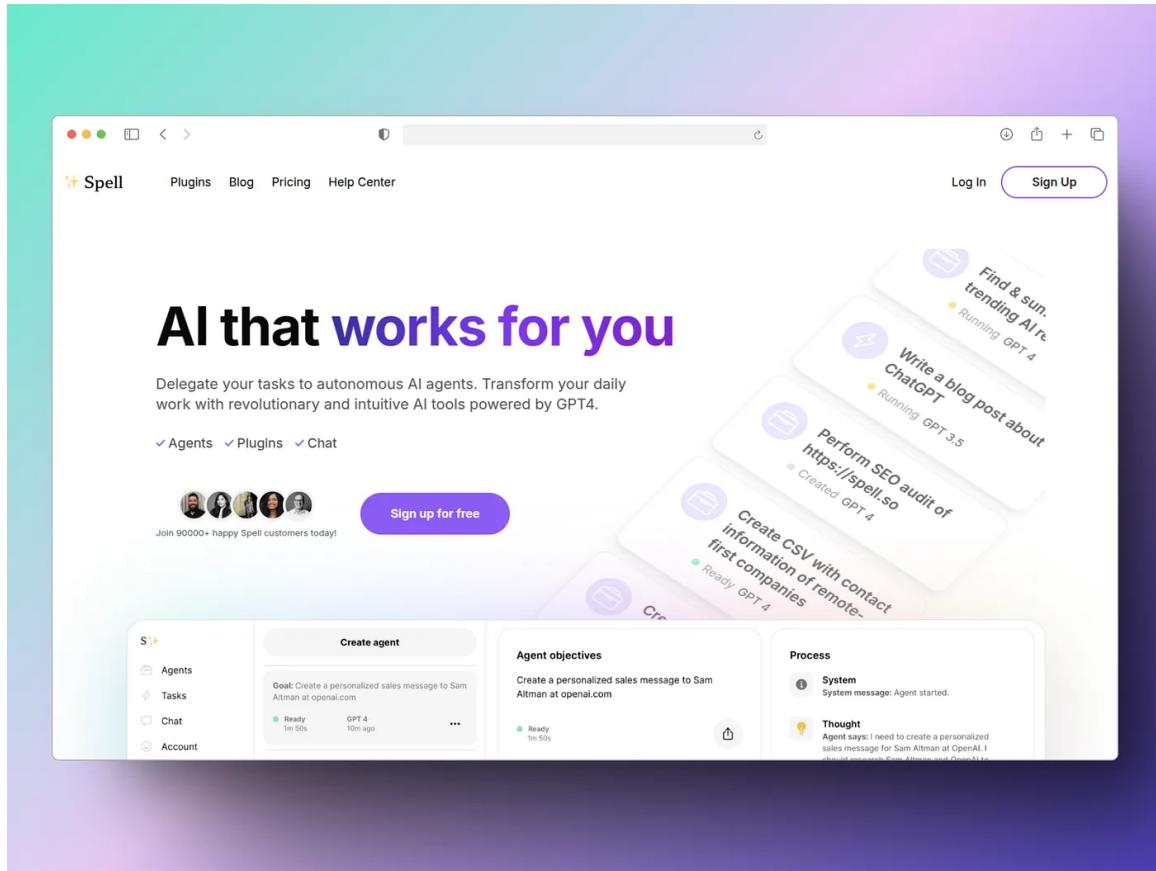

MacWhisper is a powerful tool for **turning audio and video into text quickly**.

It listens to meetings, podcasts, and YouTube videos, writing everything down for you so you don't miss important details.

It works fast, supports many languages, and keeps your information private on your Mac. You can search, highlight, and even translate what you hear.

4. Spell

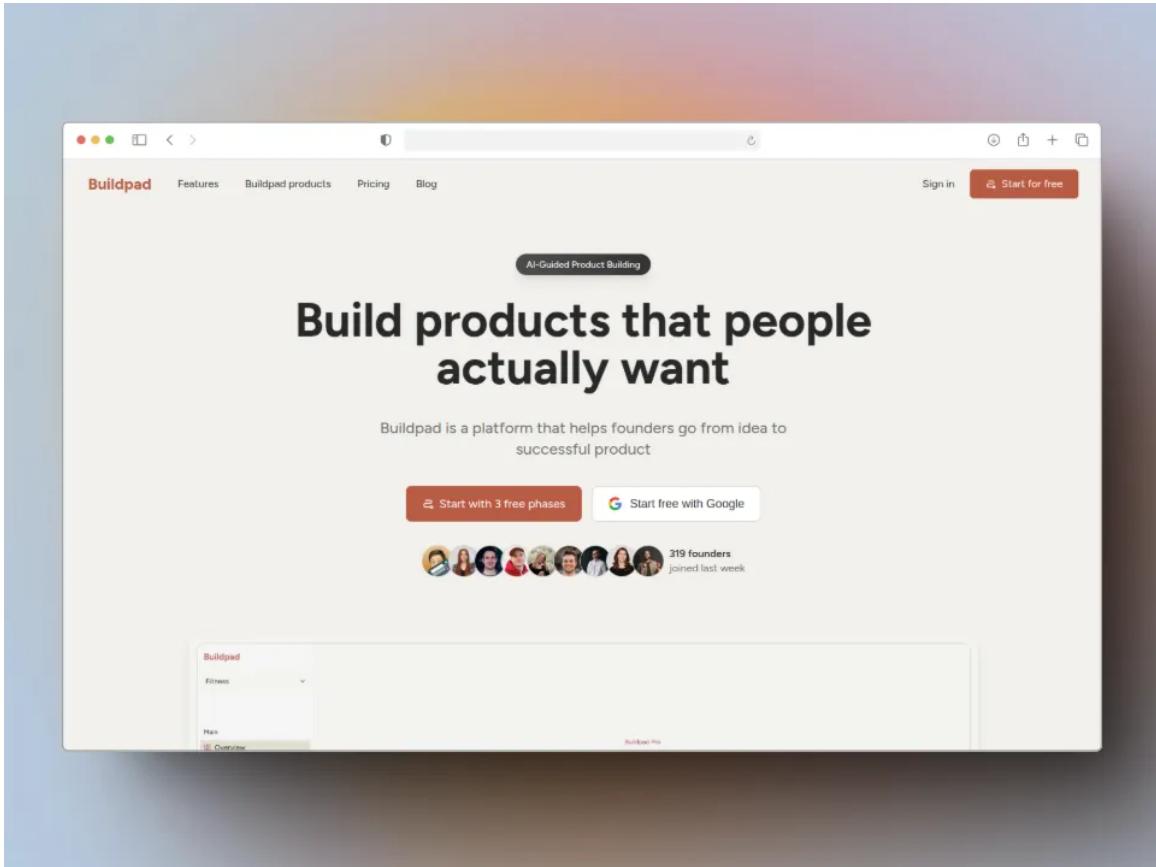

Are you still doing boring manual tasks like writing reports, analyzing data, or planning your next big project?

Spell helps you get things done faster by **automating boring tasks and giving smart suggestions.**

It is useful for students, business owners, or anyone who wants to save time. This AI agent simplifies your work and helps you automate manual tasks.

5. Buildpad

Building a product that people really want is hard.

But not now, Buildpad is the perfect platform for people who want to create products and apps that users will love.

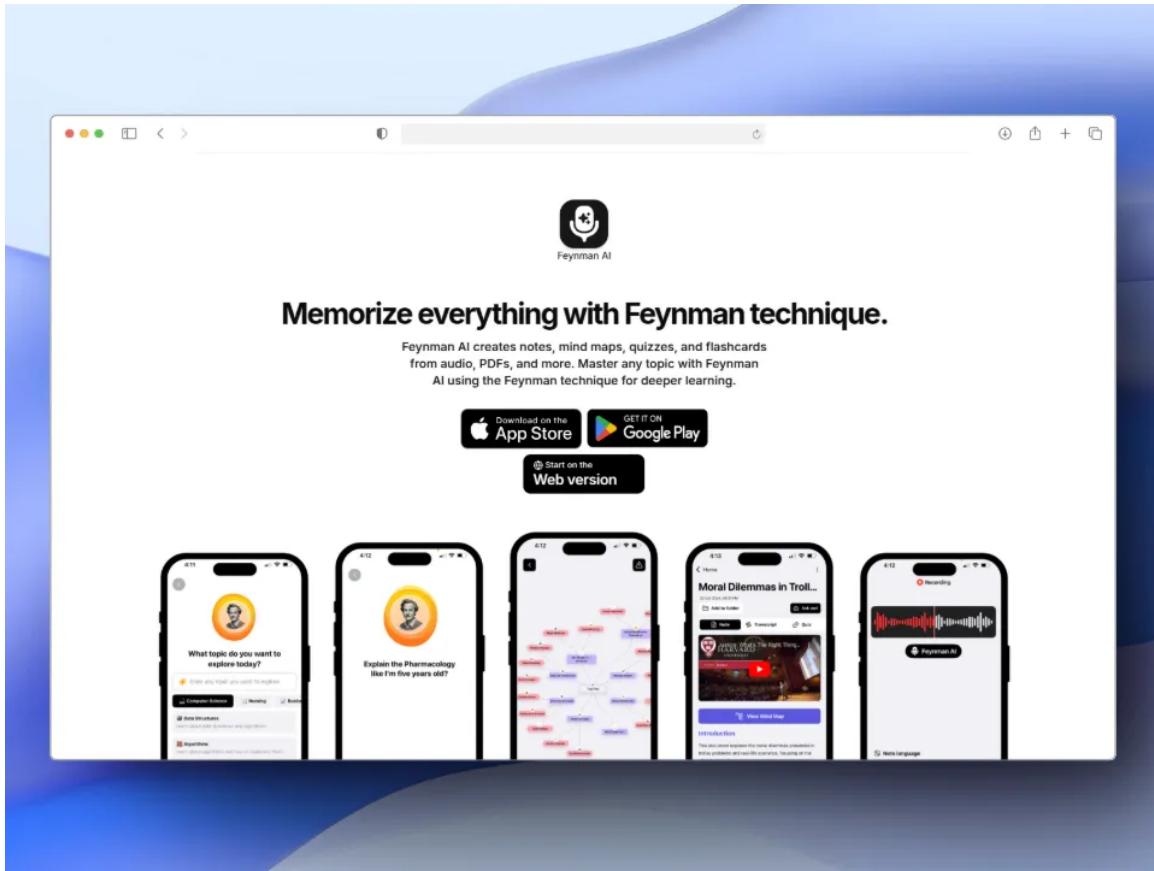

It gives you step by step roadmap to build the perfect product:

- coming up with an idea to launch your product.
- find if the idea is good by searching Reddit.
- plan and build the product.
- give you tips on how to launch it.
- and more.

You can start using it for free to check if the product you intend to build is worthwhile.

6. Feynman AI

Want to become more smarter like Fayman?

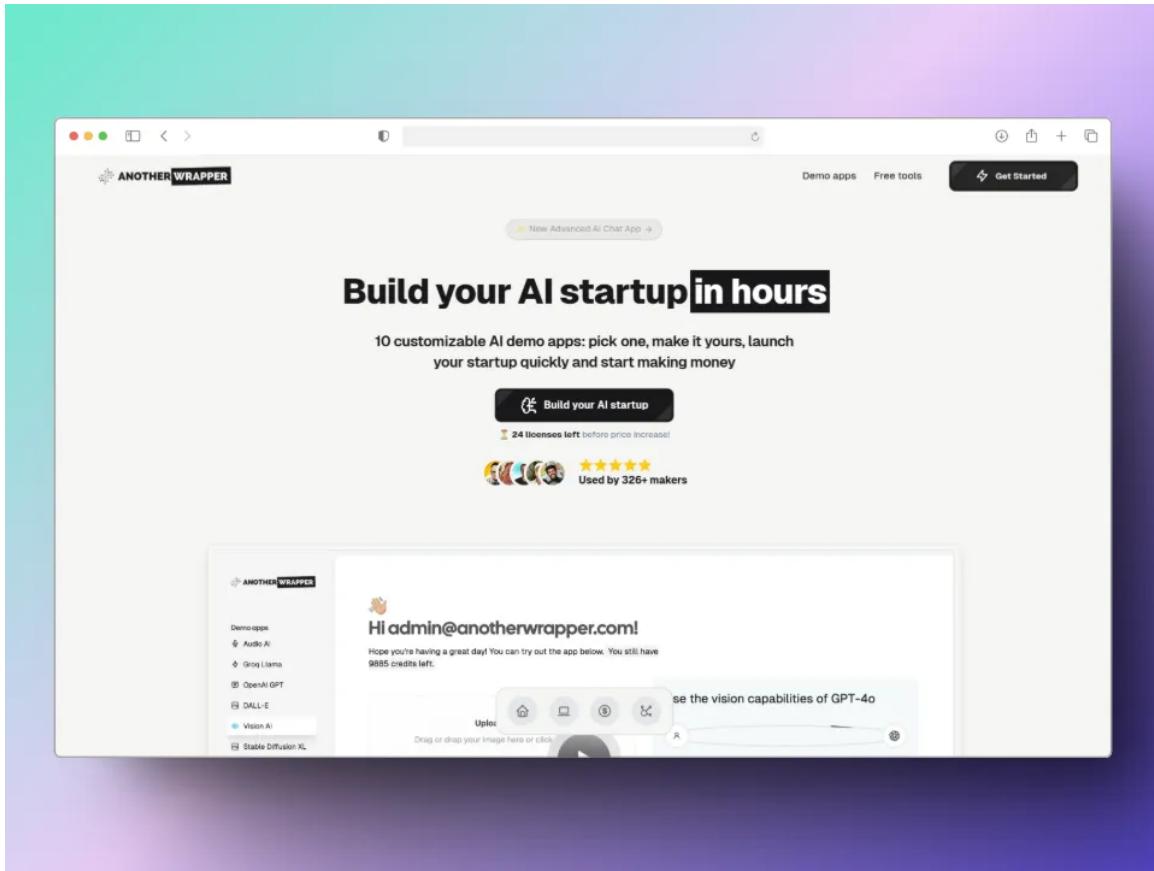

Try this app if you want to become more good at memorizing and sharpening your mind.

It creates notes, mind maps, quizzes, and flashcards from audio, PDFs, and more—the best app for students, professionals, or anyone who wants to learn faster.

This app helps you to organize your thoughts, improve your understanding, and test your knowledge.

7. Another Wrapper

Want to build your own AI Apps?

Try Another Wrapper, it's the best Starter kit to build AI apps and tools fast, even if you're a beginner.

It comes with 10 ready-to-use demo apps, so you don't have to start from scratch. You can customize these apps to create your own AI startup in just hours, saving weeks of coding time.

It includes everything you need, like AI models, authentication, and payment providers. Making AI apps is important nowadays because they can solve real problems and make money fast.

What are your thoughts?

Mia Balan

Jan 26

Feyman AI really caught my eye, mind maps and flashcards are such underrated learning tools, and having an app to streamline that process is genius. I'd also suggest pairing it with Buildpad for anyone working on innovative projects, boosting your memory while launching a product sounds like a winning combo.
